Children's Peace Center
at Our Lady of Peace

Children's Treatment Program

The Children's Treatment Program (CTP) at Our Lady of Peace offers treatment for children who are experiencing emotional and/or behavior problems, such as anxiety, depression, attention deficit hyperactivity disorder, effects of attachment issues and/or post-traumatic stress disorder.

The treatment goal is to treat and stabilize the child's condition and arrange for appropriate follow up treatment in order to integrate the child back into the home and community as quickly as possible. We want and encourage parents, the family and the community providers to be engaged and involved in treatment. The unit and program has been specially designed for children so that their environment feels friendly and safe.

Treatment is conducted by a diverse, professional team including:

- Child Psychiatrists
- Play Therapists
- Nurses
- Social Workers
- Activity Therapists
- Mental Health Workers

Children Treatment Program working garden

Treatment provided includes: Psychiatric evaluation and medication management; Individual, family and group therapy; Play therapy; Recreational therapies, Structured milieu; Full time nursing oversight and care.

"I can hardly put into words how much Peace helped me and my child. I live all the way in Lexington, but I always felt like I knew what was going on with my child. I knew that he was safe. The staff did so much to help Timothy, and our whole family. I can't say enough wonderful things about his care there at Peace."

Mother of patient, Timothy
