Orthopaedics Program

Jewish Orthopaedic Care at Sts. Mary & Elizabeth Hospital offers many services through our surgical department. Total joint replacements, including hips and knees, sports medicine and foot and ankle procedures account for the highest number of procedures performed at Sts. Mary & Elizabeth Hospital. In recent years, the orthopaedic program has made a number of investments in state-of-the-art equipment and tools to provide expert care for our patients.

The Orthopaedic Unit

The Orthopaedic Unit includes 33 comfortable private patient rooms. Fourteen of those are within the Total Bone and Joint Center at Sts. Mary & Elizabeth Hospital. Patient rooms include fold out couches for family members. A dining area on the unit provides a nice setting for patients and their families to share a meal together. A physical therapy area is also located on the unit and is supported by an in-house Physical Therapy Department serviced by Frazier Rehab Institute. The physical therapy area provides an opportunity to conduct group therapy sessions, allowing patients to support and encourage one another through their recovery process.

Orthopaedic Program Team Members

Orthopaedic Program team members at Sts. Mary & Elizabeth Hospital are highly skilled in orthopaedic procedures. They focus on providing patient care with complete satisfaction.

Patient Care

The Sts. Mary & Elizabeth Orthopaedic Program provides an innovative approach to patient care including pre-operative patient education classes and music therapy. Through the pre-operative patient education program, classes are held each week providing patients the opportunity to learn more about their procedure and decrease their anxiety prior to surgery. Music therapy is offered in the holding area prior to surgery and throughout the patient's stay. Music therapy provides a decreased focus on pain and an increased satisfaction level.

Designated Blue Distinction® Center of Excellence

Continuing to provide excellence above all, Sts. Mary & Elizabeth Hospital has been designated as a Blue Distinction® Center for Knee and Hip Replacement by Anthem Blue Cross and Blue Shield in Kentucky.

Blue Distinction puts a high value on research and evidenced-based health and medical information. Anthem is committed to working with doctors and hospitals across the state, which demonstrates quality, cost effective care and better overall outcomes for patients.

For more information on Blue Distinction selection criteria, visit www.bcbs.com.
