

Children's Peace Center at Our Lady of Peace

Crossroads Child/Adolescent Partial Hospitalization Program

Crossroads is a year-round behavioral health partial hospitalization outpatient treatment program serving school age youth who are struggling with emotional and/or behavioral disorders. We have a cheerful environment that promotes change, stabilization and healing for children and teenagers.

The Lisa Griggs Room
for therapy sessions

Our team of professionals includes Board Certified Psychiatrists, Licensed Clinical Social Workers, Certified Social Workers, Registered Nurses, Counselors and a Certified Professional Art Therapist. Treatment includes intensive interventions including psychiatric assessment and treatment, group therapy, family therapy, individual therapy, art therapy, psycho-education, recreation therapy and case management. Case management is especially focused on involving community supports such as home schools, outpatient therapist and new supports or in-home resources to ensure there are supports in place to address long-term issues that may continue after stabilization in Crossroads. Jefferson County Public Schools academic education through Peace Academy is also included in the program day to allow patients to continue academic progress as they receive treatment.

Our excellent clinical services provide our patients with a feeling of caring and safety as they work to feel better and improve their lives.

"I love Crossroads. The staff was fabulous and very open to working with my ideas and suggestions for how to help my daughter. The daily communication was excellent, and I knew my child was very safe and secure there during the day and in good hands. I didn't have to worry about her behaviors because I knew she was with professionals who would help her express herself in more appropriate ways and could work with her to calm herself when she was upset, scared, nervous or angry. My daughter not only got a handle on her problems, but she enjoyed being in the program. She felt that she was supported and that she was respected and heard by the staff. I would recommend this program to anyone."

Parent of patient, Jasmine
